PERSONAL AND PROFESSIONAL

Personal

I live in Østerbro, Copenhagen with my girlfriend. I enjoy spending quality time with family and staying active through golf and badminton. I'm passionate about woodworking and creating things with my hands in my spare time

Teambuilder and collaborator

I'm passionate about empowerment and building strong team relationships. Having evolved from a specialist to a cross-functional collaborator, I focus on reducing blind spots and ensuring alignment through a holistic approach.

Results-Driven Problem Solver

I bring initiative, energy, and solution-focused thinking to every project. My process-oriented style ensures high-quality, timely delivery.

Culture & Performance Driver

I believe collaboration, curiosity, and shared ownership create both excellent results and enjoyable work cultures. With experience in local and global stakeholder engagement at all levels, I'm committed to fostering productive team environments and driving quality outcomes.

EXPERIENCE IN SHORT

- **Executive Communication:** Presented strategic recommendations to ELT board
- **Digital Transformation:** Drove digital transformation by embedding data analytics into planning processes
- **Cost Optimization:** Optimized South American distribution strategy, delivering cost savings
- **Global Stakeholder Management:** Built cross-functional relationships between APAC teams and HQ
- **Technical Skills:** Power BI expertise for data visualization and reporting
- **Tool Implementation:** Implemented new forecasting tool across global operations
- **Cross-functional Leadership:** Initiated collaboration between Supply Chain, Marketing, and Finance
- **Risk Management:** Led development of risk management system

WORK EXPERIENCE

Analytics Manager in Commercial Supply Chain

Coloplast | Copenhagen | 2022 – Present

- Led development of proactive early-warning system, reducing crisis projects by identifying supply chain risks before escalation
- Presented strategic recommendations to ELT board for Coupling Crisis Project; achieved cost reductions and enhanced transparency
- Drove digital transformation by embedding data analytics into planning processes and developing LOT-tracking tool for improved traceability

KASPER MEIER

7 years of experience with projects and Supply Chain

- Optimized South American distribution strategy through production and transportation routing analysis, delivering both cost savings and environmental benefits
- Strengthened global supply chain alignment through on-site collaboration at Cartago, Tatabánya, and supplier facilities
- Built strong cross-functional relationships between APAC teams and HQ, ensuring consistent global execution

Supply Chain Specialist - Demand Planner

Agilent Technologies | Copenhagen | 2019 – 2022

- Implemented new forecasting tool across global operations, improving forecast accuracy and reducing planning cycle time
- Streamlined demand planning processes through automation and standardization
- Initiated cross-department collaboration between Supply Chain, Marketing, and Finance to align forecast inputs
- Forecasted demand for new products in collaboration with marketing to achieve optimal life cycle management
- Created and deployed global SOPs for forecasting, ensuring consistent processes across 8 warehouses

Co-Founder

Bjerg og Meier IVS | 2018 – 2019

- Developed and implemented an Order Management Tool in Excel/VBA for our customer.
- The tool acted as a stepping stone for SMEs that are still too small for enterprise systems like SAP/Oracle.

Masters Students Teaching Assistant

DTU Lyngby | 2018 – 2019

- Conducted tutorial sessions for Innovation and Technology Management course

Lean and Process Agent

FOSS | Production and Supply Chain | 2015 – 2016

- Implementation of new purchasing model in SAP, with cost savings and reduced NWC
- Cross collaboration between departments: suppliers, procurement, logistics, production
- Presented to upper management stakeholders
- Optimized warehouse efficiency by implementing two-bin Kanban system
